

# Loboy & Classic Loboy Fenders

**Our Loboy fender are about 2.5" longer than a stock Heritage fender and have a classic look.**

Our composite fenders are all made at our facility in Upstate New York with all 100% USA made raw materials. Composite glass techniques make our fenders lightweight, yet very strong. The top of the rear fenders have been structrually tested to withstand 28,000 PSI, that is stronger than your OEM steel fender. Fenders do not come pre-drilled so you can profile your seat for an exact fit and desired look. We do not guarantee any paint jobs and do not accept fenders back that have holes drilled in them. [See Fender Mounting Tips](#)

## Loboy Softtail Rear:

### **NEW... Fat Loboy Rear Fender**

We took a 9" wide (200 series tires) Fatboy fender and extended it 4". Fitment 2007-15 FLST/FXST with 200mm tire. Composite fiberglass rear fender is ½ the weight yet twice the strength as a steel OEM Fender. Glassed in convoluted tubing under the fender for ease and safe wiring. Primer gelcoat finish is ready to scuff and paint.
