our Street Sweeper  
for a Custom Look.  
Fenders are easy to  
modify.**

## Street Sweeper Fenders

**Lowdown & Funky.... about 7.5" longer than Fatboy or  
Heritage Fenders**

Our composite fenders are all made at our facility in Upstate New York with all 100% USA made raw materials. Composite glass techniques make our fenders lightweight yet very strong. The top of the rear fenders have been structurally tested to withstand 28,000 PSI, that is stronger than your OEM steel fender. Fenders do not come pre drilled so you can profile your seat for an exact fit and desired look. We do not guarantee any paint jobs and do not accept fenders back that have holes drilled in them. [See Fender Mounting Tips](#)
